

**ISF/SO1/2025/7**

**« CPCS modernization for Mobile Device access»**

**Date of Signing the Agreement:** 29/09/2025

**Project timeline:** 01/05/2025 – 01/11/2027

**Project budget:** €6,588,911.42

**Description of the project:**

The project concerns the upgrade and modernization of the CPCS through the replacement of the existing computer equipment. Due to the rapid development of technology the technological equipment of Cyprus Police is unable to meet the modern operational needs and technological solutions.

Through this project, access will be granted members of the Police to data from the CPCS as well as European/international systems via mobile devices, enhancing the efficiency and operational readiness of the Cyprus Police.

**Objectives of the project:**

- The full upgrade of the CPCS through the replacement of the existing computer equipment, ensuring immediate and secure access of Police members to Central Police Systems data and to European/international systems via mobile devices, enhancing efficiency and operational readiness.
- The effective control of citizens within the territory of the Republic of Cyprus through the use of mobile devices in line with the European Commission's Recommendation for the integration of Cyprus into the Schengen Area.

**Expected Benefits:**

The modernization of the CPCS for mobile device access will contribute to improved performance and reliable operation of the Central System, significantly reducing delays and technical issues. It will enhance the operational capability of Police members, ensure compliance with European requirements, reduce maintenance costs, and provide flexibility for future upgrades.

**The project is implemented within the framework of the Internal Security Fund (ISF) and it is co-funded by the European Union and the Republic of Cyprus.**
